

AGENT OCTOBER CHALLENGE

This month's challenges are all about riddles that involve logic and reasoning. Bring in the solution to earn your blue Mastery Credit. Good luck!

There are 3 baskets at a market. One is labeled apples only, one is labeled oranges only, and the last is labeled apples and oranges mixed. The only problem is that each of the baskets are labeled incorrectly. You can only pull out 1 piece of fruit from 1 basket and then must label the baskets correctly. How will you do this?
