

AGENTS MAY CHALLENGE

This month's challenges all consist of manipulating numbers. Do your best to complete the task. See if you can figure out a problem solving strategy to help you (hint: try something other than guess, check and revise) Refer to your problem solving guide in your binder for a list of possible strategies. Good luck!

To solve this puzzle put each of the numbers 1-9 into the circles so that each line has a sum of 15.

What problem solving strategy or strategies did you use?
